

# Music Class

Thursday Morning Co-op 2016-2017

The shape note method of sight singing allows anyone to learn to sing without actually learning to read traditional round note music.

This class was originally taught during a Charlotte Mason Co-op. Hymns, Folk Songs and Music Appreciation are an important part of her method of teaching. Learning how to sight sing and some simple music theory just makes it a little more challenging and give the students a skill that can last a lifetime.

The Solfege method of sight singing uses hand movements.
